

GREAT RENO BALLOON RACE

Please mark on this frame the approximate location of your banner. Insert the dimensions of the banner and clearly indicate the units of measurement. Do not mount banners above the equator. Typical banner is 15 feet high by 30 feet wide. Please attempt to achieve these dimensions.

Banners are very important to the sponsors. Your responsibility is to fly their banners. A proper fit may be obtained by installing them correctly. Good results will produce a happy sponsor and a happier event. Please pay particular attention to this detail. Proper banner installation is detailed in the document on Banner Installation.pdf.
